DIMENSIONAL
PPAP REPORTING

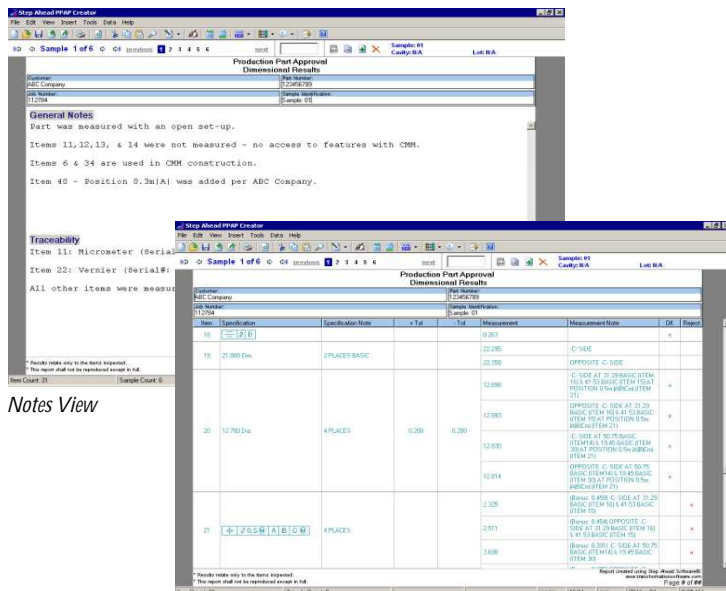

PPAP Creator

With today's economic model of "Doing More with Less", it is important to have the resources and tools that allow you to complete the tasks at hand with less time and people, while also improving quality.

This reality becomes evident each time you are faced with a PPAP submission. The transferring of measurement data into PPAP format is a daunting and formidable task, requiring hours of manual data entry, making it hard to meet strict deadlines - until now.

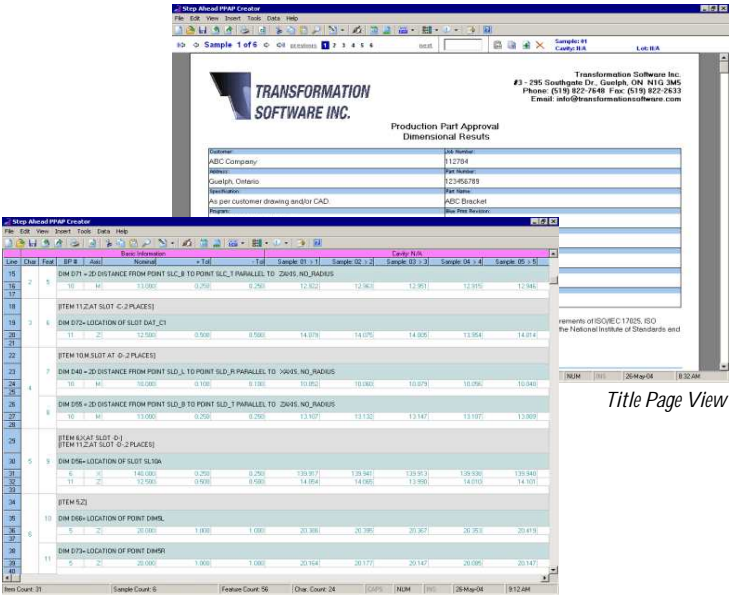

The solution - PPAP Creator.

PPAP Creator is the must-have, new product for any quality department. It is the fastest, easiest, most accurate way to create dimensional PPAP reports. Whether the data is from a CMM or manual tools, PPAP Creator will markedly reduce the time required to generate professional, errorless reports.

Notes View

PPAP View

Title Page View

All Data View

PPAP Creator's revolutionary template technology imports CMM files for automatic conversion to PPAP format. The blueprint number, specification, tolerances, actual, and any measurement notes are identified and presented according to blueprint number, rather than the order it was measured on the CMM. The entire importing process is completed in seconds.

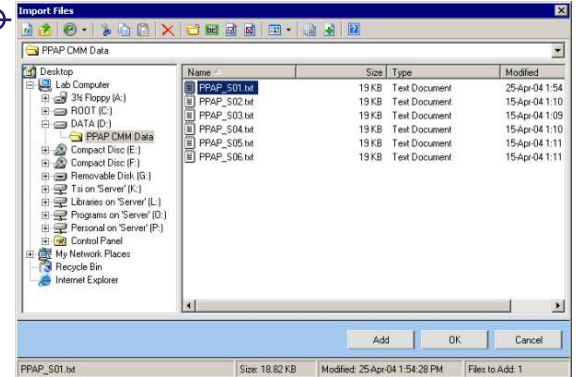

The dynamic editing grid allows you to effortlessly add manual tool results and make any finishing touches to your report. The end result - a polished, professional report generated in record time.

Easy-to-use and specifically designed to meet your Dimensional PPAP submission needs - PPAP Creator is one of the smartest quality improvement investments you can make.

Easy as 1, 2, 3...

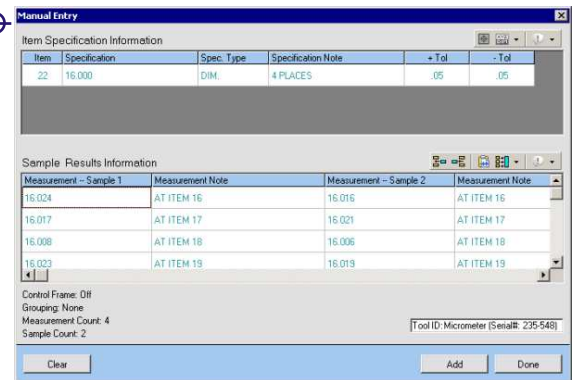

1. Import CMM Results

- ✓ Capable of 100% automation.
- ✓ Many CMM software templates ready to use - such as Virtual DMIS, PC-DMIS, and MeasureMax, to name just a few.
- ✓ Easily create a template specific for your CMM software.
- ✓ View results in All Data View (CMM output layout) or PPAP View (sorted by item number).

2. Add Manual Results

- ✓ Input results for all samples from one screen.
- ✓ Report tool identification for traceability purposes.
- ✓ Copy results across all samples with a click of the mouse.
- ✓ Easily insert comments from a drop-down list, such as "OK to Radius Gauge".
- ✓ Effortlessly insert and edit PPAP items.

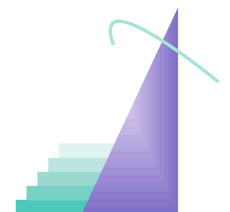

3. Print the PPAP Report

- ✓ Data sorted and reported by blueprint number.
- ✓ Select an output format - QS CFG-1003 and ISO/IEC 17025 compliant reports are standard.
- ✓ Show GD&T feature control frames.
- ✓ Bonus displayed and used to determine if the measurement is within specification or not.
- ✓ Option to report profile results as Total Profile.
- ✓ Print to a printer or create a PDF.

ITEM	DIMENSION/SPECIFICATION	PLUS TOL	MINUS TOL	SUPPLIER MEASUREMENT RESULTS	OK	NOT OK
1	12.000 DIM.	0.06	0.06	12.004	*
