

# Step Ahead Software's New Dynamic Reporting

Software to boost productivity and improve quality

Transformation Software Inc. is pleased to announce the launch of our new, innovative reporting and analysis software, providing exceptional report control and seamless integration with CMM data. Incorporating ground breaking technology, it delivers unprecedented speed and reporting flexibility.

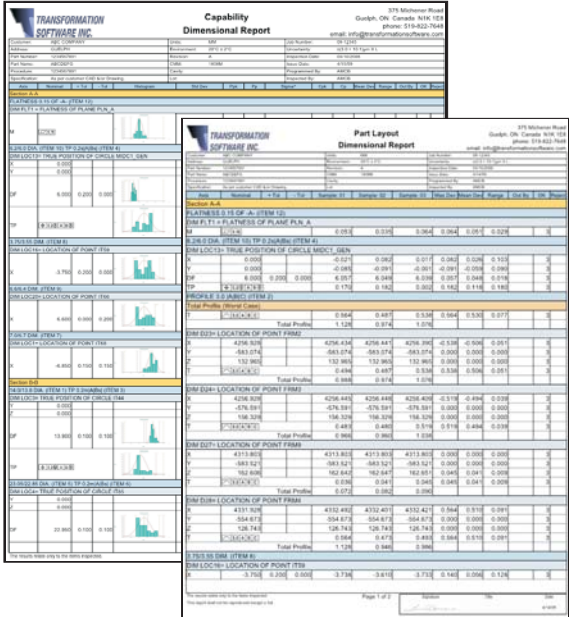

## Importing & Analysis

- Next generation data extractor dramatically increases the speed data is imported.
- Smart data extractor, interprets incongruous information within data for flawless data representation.
- Import unlimited number of samples and features.
- Dynamic editing grid allows effortless editing of nominals, tolerances, and results.
- Quickly interpret data with colour coded alerts.
- Accept/reject count, deviation, Ppk, and Cpk for each feature, plus dozens of additional key statistics and charts.

## Reporting

- WYSIWYG report designer allows you to easily create and edit report formats.
- Customizable content presents measurement data, statistics and charts you desire.
- Add manual and attribute results for a complete part representation.
- Display the deviation from nominal, % tolerance used, and out by value, for each result.
- Data filters select and show pertinent measurement information while eliminating unwanted data from your report.
- GD&T measurements interpreted and reported.
- Preview, print and create PDF files.

## Additional Features

- ❖ Customize statistical alerts to best suit your process.
- ❖ Instant on screen access to capability charts and statistics.
- ❖ Updated nominal and tolerance specifications instantly reflected in charts and statistics.
- ❖ Target charts show where the true position is located in the tolerance quadrants, and plus/minus material conditions for profile.
- ❖ Network group project settings ensure all users are using the same settings.
- ❖ Include notes, traceability and title pages for a polished report.
- ❖ Export the data to MS Excel and Open Office spreadsheets.
- ❖ Input non-CMM data, load CSV files, or copy and paste from other Windows applications.

**All reports meet  
ISO/TS 16949,  
QS 9000, ISO/IEC 17025,  
and AS9102 requirements.**

### CMM Software Interfaces

- |                |                   |
|----------------|-------------------|
| ✔ PC-DMIS      | ✔ Calypso         |
| ✔ Geomeasure   | ✔ Mcosmos         |
| ✔ Virtual DMIS | ✔ Apogee          |
| ✔ MeasureMax   | ✔ LK-DMIS         |
| ✔ OFI/FLB      | ✔ Capps & Edges   |
| ✔ Cam2         | ✔ Plus many more! |
